

AMENDMENTS TO THE CLAIMS

The claims in this listing will replace all prior versions, and listings, of claims in the application.

LISTING OF CLAIMS

1. (Canceled)

2. (Previously Presented) A transmitting apparatus that transmits a storage identifier that identifies one of a plurality of storage media and data.

3. (Canceled)

4. (Previously Presented) A transmitting method, comprising:  
transmitting a storage identifier that identifies one storage medium of a plurality of kinds of storage media and data to be accumulated on at least one storage medium identified by the storage identifier.

5-52. (Canceled)

53. (Previously Presented) A transmitting apparatus that transmits a storage identifier that identifies an inherent number corresponding to one storage medium of a plurality of storage media, and data.

54. (Previously Presented) A transmitting apparatus that transmits a storage identifier that identifies an installation place corresponding to one storage medium of a plurality of storage media, and data.

55. (Previously Presented) The transmitting apparatus according to claim 54, wherein the transmitting apparatus transmits a receiving apparatus identifier that identifies at least one receiving apparatus.

56. (Previously Presented) A transmitting apparatus that transmits a storage identifier that identifies a kind of storage medium, and data.

57. (Previously Presented) A transmitting method, comprising:  
transmitting a storage identifier that identifies an inherent number corresponding to one storage medium of a plurality of storage media, and data to be accumulated on the storage medium identified by the storage identifier.

58. (Previously Presented) A transmitting method, comprising:  
transmitting a storage identifier that identifies an installation place corresponding to one storage medium of a plurality of storage media, and data to be accumulated on the storage medium identified by the storage identifier.

59. (Previously Presented) A transmitting method, comprising:

transmitting a storage identifier that identifies a kind of storage medium, and data to be accumulated on the kind of storage medium identified by the storage identifier.

60. (Previously Presented) The transmitting apparatus according to claim 2, wherein the transmitting apparatus transmits a receiving apparatus identifier that identifies at least one receiving apparatus.

61. (Previously Presented) The transmitting apparatus according to claim 2, wherein the transmitting apparatus manages receiving apparatus identifiers.

62. (Previously Presented) The transmitting apparatus according to claim 2, comprising a memory that stores data associating at least one storage identifier with at least one of content and a kind of content.

63. (Previously Presented) The transmitting apparatus according to claim 62, wherein a user of a receiving apparatus designates the at least one of content and kind of content which each of the storage identifiers is associated with.

64. (Previously Presented) The transmitting apparatus according to claim 2, wherein the transmitting apparatus acquires a storage identifier from memory based upon one of a content and a kind of content to be transmitted, and transmits the storage identifier along with the one of the content and kind of content.

65. (Previously Presented) The transmitting method according to claim 4, further comprising managing, by a transmitting apparatus that transmits the storage identifier, receiving apparatus identifiers.

66. (Previously Presented) The transmitting method according to claim 4, further comprising associating at least one storage identifier with at least one of content and a kind of content.

67. (Previously Presented) The transmitting method according to claim 66, further comprising designating, by a user of a receiving apparatus, the at least one of content and kind of content which each of the storage identifiers is associated with.

68. (Previously Presented) The transmitting apparatus according to claim 4, further comprising acquiring a storage identifier from memory based upon one of a content and a kind of content to be transmitted, and transmitting the storage identifier along with the one of content and kind of content.

69. (New) The transmitting apparatus according to claim 56, wherein the transmitting apparatus transmits a receiving apparatus identifier that identifies at least one receiving apparatus.

P21290.A10

70. (New) The transmitting apparatus according to claim 53, wherein the transmitting apparatus transmits a receiving apparatus identifier that identifies at least one receiving apparatus.
